## Assignment -3

# **Python Programming**

## Question-1:

Download the dataset: Dataset

## **Solution:**

## Question-2:

Image Augmentation.

## **Solution:**

```
from google.colab import drive
drive.mount('/content/drive/')
data_path = '/content/drive/MyDrive/dataset/flowers/'
batch_size = 32
target_size = (64, 64)
```

Drive already mounted at /content/drive/; to attempt to forcibly remount, call drive.mount("/content/drive/", force\_remount=True).

X\_train = train\_datagen.flow\_from\_directory(data\_path,target\_size\_target\_size,batch\_size=batch\_size,subset="training",class\_mode='categorical')
X\_test = test\_datagen.flow\_from\_directory(data\_path,target\_size=target\_size,batch\_size,size=batch\_size,si
